

ENVY

DUST CONTROL AGENT

ADDITIONAL INFORMATION IS LISTED IN THE SAFETY DATA SHEET

KEY FEATURES

ECO-FRIENDLY
VISIBLE CONTACT AREAS
NON-STAINING

TECHNICAL DATA

PHYSICAL FORM: **Liquid**
COLOUR: **GREEN**
pH: **7-8**
FLASHPOINT: **N/A**
ODOUR: **ODOURLESS**
SOLUBILITY IN WATER: **N/A**
PACK SIZE: 20L, 205L, 1000L

AREAS OF USE

- CIVIL ROAD WORKS
- QUARRIES
- AGRICULTURAL
- CONSTRUCTION
- LAND REHABILITATION
- MINING LEASES
- PARKS
- DUMP SITES

PRODUCT DESCRIPTION

ENVY is a concentrated, biodegradable dual action solution suitable for hydromulch mixes and soil binding actions. It helps in erosion control and can also be used to treat contaminated soil sites. ENVY reduces water usage and helps the soil retain available moisture and will last until plants and grass growth is established. It is by nature a binding additive that aids in binding seed and mulch together in hydromulch mixes.

DIRECTIONS FOR USE

HYDROMULCHING/SOIL SEALING: Add 5 - 10L into 1000L of water in a holding tank. Apply 10 - 15L per 1000 metres squared to be treated. ENVY is to be diluted with water prior to application. The above rate is a guide and dilutions can be varied depending upon the outcome required. ENVY contains a highly pigmented green dye, to assist in monitoring application coverage.

01 INITIAL TREATMENT:

Dilute and apply ENVY at a rate of 1:8 to 1:10

02 INITIAL TREATMENT:

Dilute ENVY at a rate of 1:8 to 1:10 and apply by way of spray unit or water truck to maintain strong colour coverage. If only slight coverage is required, increase dilution.
